BATTERY CHARGER

SMART CHARGING FOR CRITICAL APPLICATIONS

Reliable and efficient battery chargers designed for continuous operation, ensuring your critical systems are always ready.

KEY FEATURES

AC/DC battery charger
Float, Boost, Equalize charging modes

High efficiency and reliable operation
Designed for continuous duty

Multiple protection functions
Over voltage, over current, short circuit, reverse polarity, over temperature

User-friendly monitoring
LCD display, alarm indication, remote communication (Modbus / CAN / Ethernet)

Customized solutions
For marine, offshore and industrial requirements

Compliance with standards
IEC, EN, BS, UL (on request)

OUR COMMITMENT

- QUALITY PRODUCTS
- PROFESSIONAL SUPPORT
- ON-TIME DELIVERY
- CUSTOMER SATISFACTION

BATTERY

RELIABLE POWER FOR A SUSTAINABLE TOMORROW

High quality batteries for standby and cyclic applications, designed for maximum reliability, long service life and superior performance in demanding environments.

KEY FEATURES

- **Wide range of types**
  VRLA (AGM / Gel), Flooded, OPzS, OPzV, Lithium (on request)
- **Proven performance**
  Suitable for harsh marine and industrial environments
- **High reliability and long service life**
  Designed for standby and cyclic applications
- **Compliant with international standards**
  IEC, EN, BS, JIS
- **Maintenance options**
  Maintenance-free (VRLA) or low maintenance (Flooded)
- **Environmentally friendly**
  Recyclable and sustainable solutions

APPLICATIONS

Marine & Offshore | Industrial Plants | Commercial Buildings | Emergency Power Systems | Telecommunication Systems | Renewable Energy Systems
